

Web Services

Last Updated Friday, 19 February 2010

Creative & Graphic Design

Our services are not the "do-it-yourself" web tools offered by so many web development companies. Instead, we will develop a creative and professional web design that showcases your business. We will meet with you to know the direction and style you want for your site, then we will work to develop a "look" that appeals to you. From colors and backgrounds to logos, we can design something that is a complimentary image for your business. Elements such as logos can then also be used by your companies for other promotional things such as signs, advertisements and printed materials.

Scripting & Writing

This is one of the services we provide that makes us a true turn-key web site developer. All web sites need to have a message for their customers and visitors. The more polished and professional, the better. Unfortunately most small and many medium businesses do not have the staff or the time to spend writing a web message for their site. You need to remain focused on your business and your customers. Since we have the writing background and creative flair, let us write your message for you.

E-Commerce

From simple credit card payments to a large scale shopping cart for selling numerous items, we can help you develop a solution for performing e-commerce for your business. Our solutions come with simple administrative web interfaces so your staff can easily add items, adjust prices and tailor your products quickly without having to come back to us for assistance.

Photography

To really enhance a web site, most businesses have pictures and other images to show their customers their products, services, locations and staff. Remember, a picture is worth a thousand words. The better the picture, the better the message and customer perception. Instead of trying to snap pictures yourself with your point and shoot camera, we can provide professional photography that will give you a high quality look and feel. Plus, all images taken for your web site will be provided to you on disk so that you can use them for other areas of your business such as advertising or displaying in your location.

Ongoing Site Maintenance & Updates

Once your web site and online, we can help you maintain it and periodically update it. Depending upon your needs, we can work out an agreement to provide the updates you periodically need for your site
